

# Tulsa Glue Dobbers Flying Field Safety Rules

Effective 2.14

The purpose of this document is to define safe flying areas for all RC model aircraft. When flying, **Safety**, **Common Sense**, and **Courtesy** should be the governing directives for all pilots regardless of aircraft type.

**Tulsa Glue Dobbers Flying Field Safety Rules**

Revision 1.4

North

**Infinite Line**

**No Fly Zone West of Yellow Line**

There shall be no flying of aircraft west of the north south Yellow line described by the west edge of the runway (except as noted) nor shall any aircraft be flown south of 31st street or near the ballpark complex to the north.

Foamy electrics may belly land in the grass as designated by the green areas North and South of the the white pilot stations.

Pilots must stay in the pilot staging areas defined by the white Pilot Stations.

3D large aircraft hovering and stationary aerobatics must be done east of the main runway unless there are no other flyers in the pattern.

Foamy Belly Landing Area

White Pilot Stations

50' X 400' Grass Runway

Foamy Belly Landing Area

Park Flyer and Foamy 3D Zone

250"
